

Dear Ladies and Gentleman's,

Here comes info about the new version of my scoring program, version 2020v49.

New features this time is:

- Reading lines in start and result lists is now possible to insert. This option you select to the right of the list
- If you like to use the Figure results as a factor in the automatic draw for start lists in Free music sessions, this is now possible. Choose this in Participation sheet (free - solo/duet/team). (The six best in figures will be drawn as the last six swimmers in free sessions. Then the next six swimmers will be drawn and get start numbers before the best group, etc.
- If you use A (for average) in "Input Figure Scores" you now also will get information to the right how much this average is. Same as in Input sheets for music sessions.
- The Rank in all Music session input sheets are now automatic. No more need to push the macro button in "Input Scores"-sheets
- And I also fixed some bugs (I hope I didn't create any new ones)

As always, you are free to download the program and use it as you wish.

You find it on my server. If you have an old link to the server, it might not work.

Use this one instead:

<http://cloud1.zoolz.co.uk/s-9DNRFKko>

And if you have any questions, or find any bugs or errors, pls send me a mail !

But first pls read the instruction how to use the program, also downloadable on the server. Many answers are in the instructions.

Best wishes on the new Synchro Year 2020.

Thomas Röhss
