Hello friends,

I have now updated my server with new versions of the scoring program and the coach card generator.

You find it with the usual link to my server:

https://cloud1.zoolz.co.uk/s-9DNRFKko

- Scoring program = version 2024 v30

- Judges' slips = version v30

- Coach card generator = version 6.3 (if someone already downloaded v6.0 – v6.2, pls download again!)

The new rules, at this point released by WA as drafts only, is applied on the programs in "2025 rules".

When the rules are official (maybe by January 2025) there might be some more changes, if they change any of the rules.

We have also not yet received the new factors. When the factors are released, I will update the programs as well.

Be advised – These files have not yet been used in any competition.

If you use them, pls check for bugs, problems etc., and report them back to me.

I will try to update with new versions as soon as I get a report of any bugs/problems.

So, before you start to prepare for a competition – Remember to check on my server again if there is a new version.

If any questions, or if you need my assistance at any competition, send me a mail.

Best Regards,

Thomas
